SUMMARY

Computer Engineer with expertise in AI/ML & systems, building solutions enhancing speed, security & use.
Full-Stack & Systems: End-to-end development in Python, C/C++, Java, JS/TS, SQL, Assembly, R.
Tools: Proficient with Linux, Docker, Git, FastAPI, React/Node.js, AWS, PyTorch, IoT/Embedded.
Private Tutor: Tutoring in AI/ML, DSA, and STEM fields via **Varsity Tutors** and **Grade Potential**.

EDUCATION

University of Illinois Chicago, College of Engineering
Bachelor of Science – Computer Engineering, Minor – Mathematics

Expected: May 2027
GPA: 3.65

EXPERIENCE

Founding Engineer

Arkboosted LLC

Sep 2025 – Present
Chicago, IL (Remote)

- Built and maintained arkboostedads.com and client sites with a security-first mindset, ensuring speed and reliability.
- Secured 3+ new clients in the first month and drove 200-275+ % MoM revenue growth through process automation.
- Advised sales & marketing on technical strategy while directing engineering solutions, boosting qualified leads 150+ %.

ML Red Team Fellow

Handshake MOVE Fellowship

Sep 2025 – Present
Remote

- Collaborated with leading researchers to red team LLMs, exposing vulnerabilities, unsafe outputs, and injection risks.
- Performed penetration testing with 200+ adversarial prompts, logging 50+ exploits & delivering mitigation strategies.

Software Developer: AI Trainer

Outlier (Scale AI, Meta-backed)

Apr 2025 – Present
Remote

- Improved AI model performance by designing and validating prompts across coding, mathematics, & science domains.
- Consistently earned 5/5 task feedback across 15+ projects & secured access to 3+ priority projects as a task reviewer.

Code Coach

The Coder School

Jan 2025 – Present
Lombard, IL

- Teaching Python, Java, C++, & web dev in 1-on-1/group sessions, guiding students through full app & project builds.
- Directed 2 coding summer camps in Pygame & Java with applied projects; retained 6+ long-term students from trials.

Deep Learning/AI Intern

UIC Department of Electrical & Computer Engineering

Jun 2024 – Aug 2024
Chicago, IL

- Led a team of 5 interns in data collection, curation, & fine-tuning of PyTorch models for wildfire image classification.
- Designed Vision Mamba, a custom CNN that improved fire classification accuracy by 30 % over baselines; (pipeline).
- Completed the [hls4ML summer school](https://hls4ml.github.io) at Northwestern University for high-level synthesis targeting FPGA hardware.

UI/UX & Machine Learning Intern

STEM-Away

Jun 2023 – Sep 2023
San Francisco, CA (Remote)

- Designed and deployed ML pipelines on AWS with 10+ interns, integrating GPT API workflows into Softr & Airtable.
- Contributed to deploying the [ByteMasters platform](https://bytemasters.com), enhancing production readiness with improved UI & UX designs.

SKILLS

Languages: Python, C, C++, Java, JavaScript, TypeScript, HTML, CSS, MATLAB, Assembly (ARM/MIPS), R, SQL, Scratch, LaTeX: (**Proficient**); VHDL, Verilog, Bash, Rust & Golang, Ruby, PHP, Swift: (**Intermediate & Familiar**).

Tools & Platforms: Linux, Docker, Kubernetes, Git, GitHub, VS Code, Wire-shark, REST/FastAPI, Spring Boot, Node.js, React, SQLite, AWS, TensorFlow, PyTorch, Jupyter Notebook, Xilinx Vivado, Tiva C, Arduino, Raspberry Pi.

Leadership: Undergraduate TA (**CS 109: MATLAB** – 2 terms); Engineering Success Mentor (**ENGR 101** – 2 terms).

PROJECTS

AArkboosted Website Auditor | *FastAPI, React, Tailwind, SQLite, Google PageSpeed API* [GitHub]

- Audit tool automating security, SEO, and UI/UX checks; Exportable PDF reports that cut manual audit time 40+ %.

Portfolio Website | *HTML5, CSS3, JavaScript, Font Awesome, Google Fonts* [GitHub] [Cloudflare]

- Matrix-themed interactive portfolio resume featuring 20+ projects, custom CLI, & a conversational MATRIX-AI bot.

MATRIX-AI Voice Assistant | *Python, ElevenLabs API, PyAudio, ANSI/CLI* [GitHub]

- Voice AI assistant with real-time speech processing, neural voice synthesis, and immersive Matrix-themed interface.

Coursework: Embedded Systems & DSA | *C, ARM (Tiva C), CCS; C++17, Vs Code* [Embedded] [DSA]

- Developed an ultra heat sensor alarm system & C++ projects including an OSM graph navigator using Dijkstra's A*.
