SUMMARY

Founder and Computer Engineering junior building full-stack & AI/ML systems for 2+ years.

EDUCATION

University of Illinois Chicago, College of Engineering

Expected: May 2027

Bachelor of Science – Computer Engineering, Minor – Mathematics

GPA: 3.65

– Leadership: Computer Science TA (CS 109, 2 terms) & Engineering Success Mentor/TA (ENGR 101, 2 terms).

– Mentorship: Code Coach @ The Coder School & Private Tutor via Varsity Tutors & Grade Potential Tutoring.

EXPERIENCE

AI Systems Engineer

Oct 2025 – Present

Talent Strategy Experts

Remote

– Developing the Neuerra Platform, an AI-powered system with a multi-tenant architecture and role-based access control (RBAC) to align talent strategy with business goals.

– Enhancing front-end modules in React for invitation flows & dashboards, while leading end-to-end deployment efforts to ensure data isolation, reliability, and performance.

Software Development Intern

Oct 2025 – Present

IDXExchange

Remote

– Led a team of six interns in designing a real estate property search application, overseeing full-stack development and integrating live MLS data via the Trestle API.

– Implemented back-end logic in PHP & Python to optimize query performance and managed deployments on a Linux, Apache, and Nginx server environment.

Founding Engineer

Sep 2025 – Present

ArkBoosted LLC

Remote

– Lead technical development & AI-based solutions, designing & deploying end-to-end scalable systems and platforms.

– Generated 200%+ MoM growth through 3+ client acquisitions & long-term partnerships; maintain arkboostedads.com.

ML Red Team Fellow

Sep 2025 – Present

Handshake MOVE Fellowship

Remote

– Red-teamed LLMs by performing penetration testing with 200+ adversarial prompts, exposing vulnerabilities, logging 50+ exploits, and delivering mitigation strategies.

Software Developer: AI Trainer

Apr 2025 – Present

Outlier (Scale AI, Meta-backed)

Remote

– Improved AI model performance by designing prompts across coding, mathematics, & science domains, achieving consistent 5/5 feedback on 15+ projects and earning reviewer status.

Deep Learning/AI Intern

Jun 2024 – Aug 2024

UIC Department of Electrical & Computer Engineering

Chicago, IL

– Led a team of 5 interns in data collection, curation, & fine-tuning of PyTorch models for wildfire image classification.

– Designed a Vision Mamba CNN improving accuracy by 30%; trained in high-level synthesis for FPGAs via Northwestern's hls4ML summer school.

SKILLS

Languages: (Proficient) Python, C/C++, Java, JavaScript/TypeScript, HTML/CSS, PHP, SQL, R, MATLAB, Bash, Assembly (ARM/MIPS); **(Familiar)** Go, Rust, VHDL, Verilog, Swift, Ruby, Scratch, LaTeX

Technologies: PyTorch, TensorFlow, NumPy, OpenCV, React, Node.js, FastAPI, Spring Boot, Docker, Kubernetes, Git/GitHub, Linux, AWS, Nginx, Apache, cPanel, Jupyter, Anaconda, VS Code

Databases & Hardware: MySQL, SQLite, REST APIs, Trestle API, Postman, Wireshark; Raspberry Pi, Tiva C, Arduino, Xilinx Vivado, Code Composer Studio, LTspice, Figma, Valgrind

PROJECTS

Neuerra AI Recruiting Platform (TSE) | *React, Multi-Tenant Arch., RBAC, REST APIs* [<https://neuerraa.com/>]

– Architecting the end-to-end product, building a scalable multi-tenant backend with a hierarchical role-based access control (RBAC) system and secure REST APIs; managing domain, MVP delivery, and landing-page deployment.

AI Voice Support System (Mohid) | *FastAPI, Python, Twilio, NLP, Email Parsing* [<https://mohid.net/>]

– Developing an intelligent voice-enabled customer support system integrating call and email automation through a coordinated AI agent stack to enhance client communication efficiency and reliability, with scaling to 700+ mosques.

ArkBoosted Website Auditor | *FastAPI, React, SQLite, Google PageSpeed API* [GitHub]

– Developed an AI-powered auditing tool that automates security and SEO analysis to generate optimization reports and automation recommendations for businesses, cutting analysis time by 90% and creating new revenue streams.
